

OOPS ASSIGNMENTS

SECTION A: CLASSES & OBJECTS (5 Assignments)

Assignment 1.1

Create classes Pen, Pencil, Eraser and call one method from each.

Assignment 1.2

Create a class Laptop with properties brand, ram, price and print object data.

Assignment 1.3

Setup multiple simple classes & their objects.

Assignment 1.4

Setup multiple classes with properties & create their objects.

Assignment 1.5

Create a class Movie and use constructor to set name and rating.

SECTION B: CONSTRUCTORS (2 Assignments)

Assignment 1.6

Create a User class with name, place, age — create objects with default & parameterized constructors.

Assignment 1.7

Create a class Movie and use constructor to set name and rating. (Practice different constructor types)

SECTION C: STATIC & FINAL (3 Assignments)

Assignment 1.8

Create a class Employee and count how many objects are created using static.

Assignment 1.9

Create a class Bank and use a static variable for bank name.

Assignment 1.10

Create a class School with final variable for school code.

SECTION D: INHERITANCE (5 Assignments)

Assignment 1.11

Create a parent class & try single inheritance.

Assignment 1.12

Create a superclass Person and subclass Student with extra property (single inheritance practice).

Assignment 1.13

Demonstrate multilevel inheritance using Device → Mobile → SmartPhone.

Assignment 1.14

Create hierarchical inheritance using Shape → Circle, Triangle, Square.

Assignment 1.15

Create a parent class & try multilevel & hierarchical inheritance (complete inheritance types).

SECTION E: ACCESS MODIFIERS (3 Assignments)

Assignment 1.16

Try public access modifier for classes, variables & methods — observe scope.

Assignment 1.17

Try private access modifier for classes, variables & methods — observe scope.

Assignment 1.18

Try protected and default access modifiers for classes, variables & methods — observe scope.

SECTION F: NON-ACCESS MODIFIERS (2 Assignments)

Assignment 1.19

Try static modifier — observe behavior changes in classes, methods & variables.

Assignment 1.20

Try final modifier — observe behavior changes in classes, methods & variables.
